IP500[®] Product

IP500[®] Member PcVue announced first IP500 Building Management System (BMS)

French company PcVue, which has a global network of offices and technical support and has history of more than 31 years providing SCADA and BMS across the globe, announced its IP500 Uses Interface as a full IoT BMS solution for large- and mid-size commercial / office buildings. The BMS solution will be installed in SmartIndustry IP500 projects in Freiburg, Germany and other similar projects. The integration of the IP500 OEM products, targeting “security and energy efficiency applications”, will demonstrate IP500 ECO solution for smart IoT applications, including mobility solutions (like an active company badge) for commercial buildings (e.g. office, hospital and industrial).

PC Vue also have launched a Global partner program where it intends to offer its software free of cost for the first year and training to interested companies/ individuals to make it easy for IP500 adoption at fast pace.

About the IP500[®] Alliance

The IP500 Alliance is an international industry initiative of leading manufacturers, system integrators and users. The aim of the Alliance is to jointly define, develop and provide a manufacturer-neutral standard and most secure global IoT wireless platform for smart commercial buildings.

The IP500 platform guarantees maximum interoperability for the interdisciplinary and interdepartmental interplay of different smart IoT devices by using central, generally introduced and accepted industrial IoT standards. The IP500 standard is also the first and only wireless platform that meets security regulations according to DKE, EN and VdS for commercial building. It therefore ensures most robust communication between security and comfort applications such as smoke detection, intrusion / access control as well as light and motion sensors.

The IP500 Alliance is represented globally in Europe (Headquarters), USA, India & Asia.

Berlin, 19th March, 2018
