

## Press Release

### IP500® Project

## **IP500® Alliance participates in Smart Industry Project in Freiburg, Germany**

The system integrator euromicron and the local industrial network & funding consortium “innoEFF & ITG” agreed to install the IP500 infrastructure and OEM products in the target group of over 100 commercial buildings in the northern industrial area of Freiburg; Germany. Due to the focus of Freiburg, to become one of the most recognized green cities worldwide, this IoT SmartIndustry project has received a significant fund from the European Union and local government of Baden-Württemberg, Germany.

ITG, euromicron and the IP500 OEMs & Partners (IP500 certified Products) are now in the process of installing the first IP500 infrastructure, IP500 OEM Products and the IP500 BMS (Building Management System) in the selected buildings in Freiburg, Germany. The extension in a second phase of the project will then address in Offenburg and Lahr more than 300 buildings in total.

### **About the IP500® Alliance**

The IP500 Alliance is an international industry initiative of leading manufacturers, system integrators and users. The aim of the Alliance is to jointly define, develop and provide a manufacturer-neutral standard and most secure global IoT wireless platform for smart commercial buildings.

The IP500 platform guarantees maximum interoperability for the interdisciplinary and interdepartmental interplay of different smart IoT devices by using central, generally introduced and accepted industrial IoT standards. The IP500 standard is also the first and only wireless platform that meets security regulations according to DKE, EN and VdS for commercial building. It therefore ensures most robust communication between security and comfort applications such as smoke detection, intrusion / access control as well as light and motion sensors.

The IP500 Alliance is represented globally in Europe (Headquarters), USA, India & Asia.

**Berlin, 19<sup>th</sup> March, 2018**
